DEPARTMENT OF AGRICULTURE

LOCAL FOOD CONNECTOR

The Local Food Connector is an online communication tool designed to connect South Carolina school food authorities with South Carolina farmers and agribusinesses.

SFAs can create accounts and browse farm profiles to find information about available products, delivery capabilities, and contact information.

The platform will **not** facilitate transactions or sales. Instead, it will make it easier for schools to find and connect directly with local producers. By bringing this information into one place, the Local Food Connector will help streamline the search for local food and increase opportunities for schools to purchase South Carolina-grown products.
